

=> Spring data => finder methods

Select ← { custom methods }  
↓ implemented  
spring in memory proxy class

---

{ custom query :- HQL  
(LOB) query →

Working with @Query methods :-

=> @Query(HQL/JPQL, NativeSQL query)  
=> return - methodName - parameter }

←  
Hibernate → JPA  
↓

Hibernate query language (HQL) → JPQL =>

SQL query → { TableName, columnName }

HQL → Entity properties

SQL ==> SELECT \* FROM tableName;

HQL ==> FROM EntityClassName;

SQL ==> SELECT \* FROM vaccinatedetails;

HQL ==> FROM VaccineDetails;

SQL ==> SELECT id, vaccineName FROM vaccinatedetails;

HQL ==> SELECT id, vaccineName FROM VaccineDetails;

↓  
property

↓  
Entity class

SQL ==> SELECT id, vaccineName, vaccineCompany FROM vaccinatedetails WHERE id IN(?,?,?);

HQL ==> SELECT id, vaccineName, vaccineCompany FROM VaccineDetails WHERE id IN(:id1, :id2);
