Servlet => Session mangmut

{ -> Cookies ✓
   -> Session API ✓

=> client - server Architecture
        ⇊
      web APP
        ⇊
    http   -> stateless
              Ly It cannot remember client req/info for future.
              Ly opon multiple requts from the clint, Every requt will
                  tricked as a new requst.

=> in order to store client information across multiple requts we need
    Some mechanism -> session API   } { of session
                      { cookies }   { managmut }
