=>[Spring Batch] => Robust Batch Application

&rarrow; process the Bulk Records/Data

eg:- Greeting & offer to all customer
Credit card statement Generation.
Generating payslips.
Monthly salary Credit to all employees

=> CSV file   read   SpringBoot   => Database
    Records   all   process   Table
      records   store
             in table
(source)   (destination)

=> Spring Batch terminologies :-

&rarrow; Job Launcher
&rarrow; Job
&rarrow; Step
   &rarrow; ItemReader
   &rarrow; ItemProcesser
   &rarrow; Item writer
&rarrow; Job Repository

&rarrow; ItemReader &rarrow; source
&rarrow; ItemProcess &rarrow; (writing (iteu), op)
&rarrow; Item write &rarrow; destination

JobLauncher &rarrow; Job &rarrow; Step

JobRepository
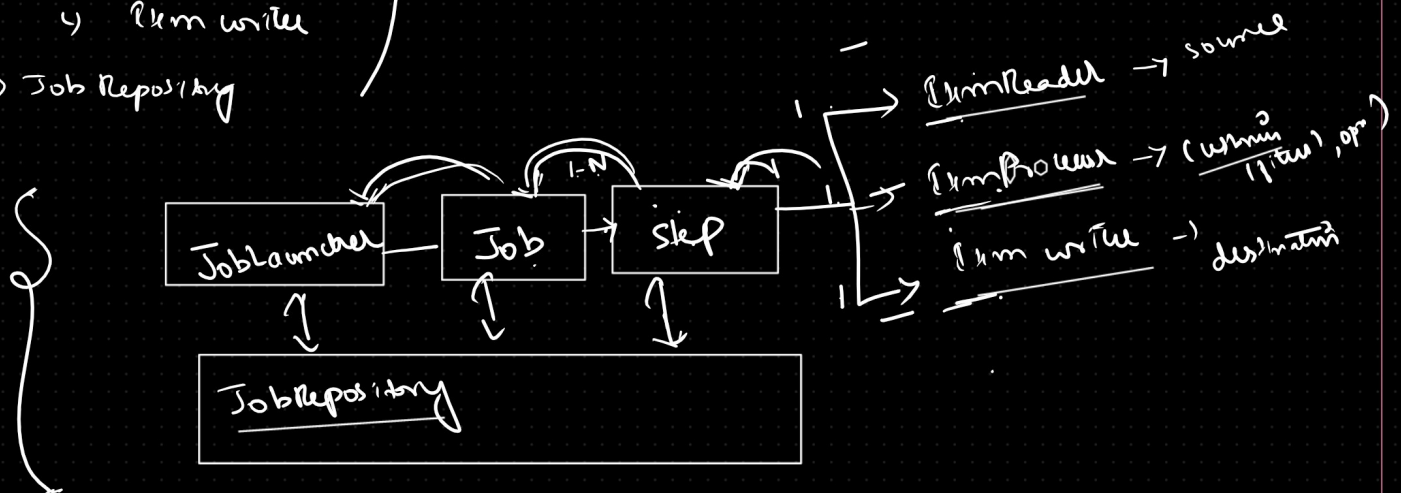

Step:-
Read the data from source -> Item Reader
Process the data -> Item Processor
Write the Data in to Destination -> ItemWriter

$\Rightarrow$ SpringBoot Batch project :-

        $\rightarrow$ Web - starter

        $\rightarrow$ data jpa

        $\rightarrow$ Mysql

        $\rightarrow$ Lombok

        $\rightarrow$ spring Batch =>
